- "Up" years have occurred much more frequently than "down" years in the US stock market from 1926 through 2024.
- The market averaged gains of 10.2% per year during this period.
- About three-quarters of the down years were followed by up years. The most recent example: a 19.8% loss in 2022 followed by a 26.6% gain in 2023.

The stock market tends to reward investors who can weather annual ups and downs and stay committed to a long-term plan.
